

COVID-19: Our Isolation Plan

Being ready helps to keep us all safe

If someone in your household gets COVID-19, your whole household will need to isolate until everyone has fully recovered (3 days symptom-free).

Omicron spreads fast - everyone in the house may catch the virus.

So be ready, make a plan and have a kōrero.

→ WHAT YOU NEED TO PLAN FOR

- Getting food and supplies – organise with friends, whānau or neighbours to do contactless drop offs.
- Mahi work and/or kura school(s) – prepare to work and/or study from home.
- What happens with children, other dependants, or shared custody arrangements?
- If you require care services – decide if you need to isolate together.
- How will you try and minimise the spread to household members who are not unwell?
Find activities to help pass the time.

→ KNOW AND SHARE YOUR PLANS

- Kōrero together – ensure everyone in the household, including kids, knows what will happen when you need to isolate.
- Share plans with those supporting and helping you (or who you are supporting)

→ IN CASE OF EMERGENCY

- Most of us can recover safely at home. If you need advice or your symptoms worsen, call your doctor, health provider or Healthline on 0800 358 5453.
- If you are having trouble breathing, call 111 immediately.
- Have personal information ready, including:
Full names, birth dates/ages, NHI numbers, medical conditions and prescriptions, GPs/Health providers and other emergency contact details
- Prepare instructions for pets, plants or paying bills, just in case you need to recover away from home.

→ STAY CONNECTED

We are all in this together, and we will get through together.

- Stay connected – arrange regular catch-ups with your whānau, friends and community. If you are isolating, make sure these are online or by phone.
- Support your friends, whānau and workmates to make their plans to get ready.
- Find out what your community is doing – is there a group making meals to freeze, sharing planning tips, or just staying in the know?

Checklist: Get things ready to isolate

* check expiry dates and follow instructions, especially with medications

- Tissues
- Soap
- Sanitiser
- Masks
- Cleaning products & gloves
- Rubbish bags (try and have separate bags for tissues before putting in main rubbish bags)
- Paracetamol and/or ibuprofen
- Drinks and other medications that help with cold and flu-like symptoms, like lemon tea with honey, cough syrup
- Practice healthy habits like coughing/sneezing into elbow and washing hands to reduce the spread of germs.
- Could ventilation be improved? Even opening windows will help to get rid of the virus.

→ Ways to feel better if you're māuiui unwell

For tiredness, fever, aches and pains:

- Get plenty of sleep and rest to help your body recover
- Stay hydrated by drinking plenty of fluids
- Take medication like paracetamol or ibuprofen

For coughs, sore throats or blocked noses, try:

- Hot lemon and honey or kawakawa tea
- Saltwater gargling
- Chest vapour rubs
- Nose and throat treatments, like sprays
- Cough syrup or soothing lozenges

→ Looking after your mental wellbeing

- Try to be kind and gentle with each other as isolating together for some weeks may have its ups and downs
- Acknowledge your feelings – becoming anxious or stressed is a normal response when times get challenging
- Try and stick to routines where possible
- Put a limit on any time online and get some fresh air
- If you start to feel overwhelmed, speak with a trained counsellor any time, day or night -free call or text on 1737
